

vue • ultrasound gel™

providing optimal transmission

professional, water soluble
and hypoallergenic

Acoustically correct for the broad range of ultrasound frequencies used today, **Vue Ultrasound Gel** is also water soluble and hypoallergenic. So it's a convenient, versatile way to provide optimal transmission in ultrasonic diagnosis, ultrasonic therapy, ECG, EEG and EMG.

As specialists in gels for clinical applications, we've formulated **Vue Ultrasound Gel** to offer the ideal viscosity for a wide variety of procedures. Working with our network of clinical contacts, and responding to their expert feedback, we've developed this product to be as effective and easy to use as possible.

Why Vue Ultrasound Gel?

- ➔ Offers superb 'standoff' for superficial scanning
- ➔ Hypoallergenic, water soluble and non-sticky, ensuring maximum patient comfort
- ➔ Doesn't stain or damage skin, clothing or transducers
- ➔ Excellent viscosity
- ➔ Available in a range of sizes to suit different applications

OM code	NHS code	Description	Inner pack	Outer pack
1156	FTM 338	20ml sachet	Pack of 30	Case of 240
1157	FTM 302	250ml bottle	NA	Case of 40
1165	NA	5l container & 250ml refillable bottle	NA	Case of 4

Our range:

- ➔ **20ml sterile sachet**
Sterile, individually wrapped sachets, designed to prevent cross contamination during procedures, in particular when scanning close to an open wound, trans-vaginally or in biopsies.
- ➔ **250ml bottle**
Single-use bottle promotes infection control procedures, while letting you dispense large amounts of gel easily onto the patient's skin.
- ➔ **5l container**
Flexible plastic container for multiple use, designed to ensure you can dispense all the gel with no wastage.
